fractalgo SwingTrader (SI) Trading System

To learn more about this system,
Call 800.669.8838/312.987.0043 or [Email us](#).

Developer: fractalgo.com

Profit and Loss as shown below is not necessarily representative of a single account, but is a compilation of several accounts over time, and is based on the physical trade ticket. These results are based on 1 contract, with a starting balance of \$79,000. Monthly subscription \$539 and commission \$30/RT along with all fees are included in the profit/loss calculation. The risk of loss in trading commodity futures and options can be substantial and may not be suitable for all investors.

System Description

Market Sector: Metals

Markets Traded: [SI](#)

System Type: Swing Trading

Risk per Trade: varies

Trading Rules: Not Disclosed

Suggested Capital: \$79,000

Developer Fee: \$539.00 per Month

System Description:

fractalgo SwingTrader (SI) and all other related fractalgo products are pattern recognition programs. The programs use math and physics to identify fractal patterns in the market, switching from long to short and back again when new patterns emerge. Market data, including price, volume, momentum (delta and delta of delta) and elapsed time (duration of a pattern) is absorbed from every tick for the entire history of a market. Fourier transforms are used to evenly slice that data until all segments match and wave and group velocity functions are used to project forward that pattern to determine the next trades. fractalgo SwingTrader (SI) is systematic, unemotional and completely uncorrelated to any other analysis technique.

Statistical Summary

fractalgo SwingTrader (SI)	Tracked Since: November 01, 2016
Profit/Loss Total:	(\$30,748.78)

Definitions:

Maximum Draw Down The biggest decline of equity over a specific period of time. Peak to valley is the difference between a high point of equity and the next lowest point of equity over a number of trades on the monthly basis.

Purpose: This indicator is used to help analyze the risk of an account.

How to use: The Maximum Draw Down is a tool for the portfolio selection process. It is used as a risk measure and allows individuals to get an indication about how an account might react to a trend of falling prices.

Sharpe Ratio Measures the return earned in excess of the risk-free rate on a portfolio to the portfolio's total risk. The prior month's 90 Day T-Bill Rate is used as risk-free rate.

Purpose: Like other risk-adjusted ratios, the Sharpe Ratio compares the returns to a specific measure of risk. Here, the standard deviation is used. The Sharpe Ratio helps evaluate the potential returns in light of the underlying risk.

How to use: The Sharpe Ratio is used to evaluate the quality rather than the quantity of the returns of a security or a portfolio of securities. The higher the value of the indicator, the better the quality of the returns on a risk/reward basis.

Sterling Ratio A risk-adjusted ratio given by dividing the returns on a security by the Maximum Draw Down (the biggest consecutive loss) for the same period.

Purpose: Like other risk-adjusted ratios, the Sterling Ratio compares the returns to a specific measure of risk. Here, the Maximum Draw Down is used. The Sterling Ratio helps evaluate the potential returns on a security in light of the underlying risk.

How to use: The Sterling Ratio is used to evaluate the quality rather than the quantity of the returns on a security or a portfolio of securities. The higher the value of the indicator, the better the quality of the returns on a risk/reward basis.

System Trades Disclosure:

System Description

"System Description" is based upon information obtained from specific system marketing documents, system developers and/or system vendors themselves. While the information is believed to be reliable, we cannot guarantee its completeness or accuracy.

Actual Monthly Performance

The table and charts represent the monthly/quarterly/annual summation of actual trades based on system-specified contract(s) executed through Striker

Securities, Inc. using the referenced trading system or system vendor for the stated time period. Commissions and monthly vendor fees are deducted from the tabulation. Results are based on 1 contract. If a client trades 2 contracts his gain or loss is twice as displayed (and so on). This table is presented for information purposes only and is not a solicitation for the referenced system or vendor. The purpose of this information is for clients to compare their brokerage statements to what is displayed on Striker's site. Striker as a matter of policy has no ownership with the referenced system or vendor or any other trading system or vendor. Past trade history may not be indicative of future results. The results indicated here may or may not be typical of the performance of this system and, ALTHOUGH I WE BELIEVE THIS INFORMATION TO BE ACCURATE, STRIKER SECURITIES, INC. MAKES NO ENDORSEMENT OF THIS OR ANY SYSTEM NOR WARRANTS ITS PERFORMANCE. This is not the only trading system that Striker executes for its clients. Potential traders should carefully investigate, evaluate and compare trading systems before investing capital. Some or all trading systems may involve an inappropriate level of risk for potential traders. It is the nature of commodity trading that where there is the opportunity for profit, there is also the risk of loss. In opening an account through Striker, Customer acknowledges and agrees that he/she will rely solely upon the information that Striker provides to you. Thus, all prior third-party materials provided are superseded by the information and disclosures provided by Striker.

Important Information About this Trading System Analysis

Statistics, tables, charts and other information on trading system monthly performance are based on actual trading unless otherwise specified. Actual dollar and percentage gains/losses experienced by investors would depend on many factors not accounted for in these statistics, including, but not limited to, starting account balances, market behavior, developer fees, incidence of split fills and other variations in order execution, and the duration and extent of individual investor participation in the specified system. While the information and statistics given are believed to be complete and accurate we cannot guarantee their completeness or accuracy as they results are key punched and subject to human error. Performance information is not the performance of a single account, but a compilation of several accounts over time, and is based on the physical trading ticket. THIS INFORMATION IS PROVIDED FOR EDUCATIONAL/ INFORMATIONAL PURPOSES ONLY AND USED BY CURRENT CLIENTS TO AUDIT THEIR STATEMENTS TO STRIKER SITE. These results are not indicative of, and have no bearing on, any individual results that may be attained by the trading system in the future.

This trading system, like any other, may involve an inappropriate level of risk for prospective investors. THE RISK OF LOSS IN TRADING COMMODITY FUTURES AND OPTIONS CAN BE SUBSTANTIAL AND MAY NOT BE SUITABLE FOR ALL INVESTORS. Prior to purchasing or leasing a trading system from this or any other system vendor or investing in a trading system with a registered commodity trading representative, investors need to carefully consider whether such trading is suitable for them in light of their own specific financial condition. In some cases, futures accounts are subject to substantial charges for commission, management, incentive or advisory fees. It may be necessary for accounts subject to these charges to make substantial trading profits to avoid depletion or exhaustion of their assets. In addition, one should carefully study the accompanying prospectus, account forms, disclosure documents and/or risk disclosure statements required by the CFTC or NFA, which are provided directly by the system vendor and/or CTA's.

The information contained in this report is provided with the objective of "standardizing" trading systems measurements, and it is intended for educational /informational purposes only. All information is offered with the understanding that an investor considering purchasing or leasing a system must carry out his/her own research and due diligence in deciding whether to purchase or lease any trading system noted within or without this report. This report does not constitute a solicitation to purchase or invest in any trading system which may be mentioned herein. STRIKER SECURITIES, INC. MAKES NO ENDORSEMENT OF THIS OR ANY OTHER TRADING SYSTEM NOR WARRANTS ITS PERFORMANCE. THIS IS NOT A SOLICITATION TO PURCHASE OR SUBSCRIBE TO ANY TRADING SYSTEM.

Copyright © 1997-2018 Striker Securities, Inc. All rights reserved.

Disclaimer The risk of trading can be substantial and each investor and/or trader must consider whether this is a suitable investment. Past performance, whether actual or indicated by simulated historical tests of strategies, is not necessarily indicative of future results. Striker is a member of the National Futures Association ("NFA"), the Managed Funds Association ("MFA"), and the National Introducing Broker Association ("NIBA"). Striker is registered with the Commodity Futures Trading Commission ("CFTC"), and was formerly registered with the Securities Exchange Commission ("SEC"). Additionally, Striker is a former member of the Financial Industry Regulatory Authority ("FINRA"), and the Securities Investor Protection Corporation ("SIPC"). FINRA is the largest non-governmental regulator for all securities business in the United States. Please read Striker Disclosure Statement for the additional disclosure.

Futures Trading Disclaimer:

Transactions in securities futures, commodity and index futures and options on futures carry a high degree of risk. The amount of initial margin is small relative to the value of the futures contract, meaning that transactions are heavily "leveraged". A relatively small market movement will have a proportionately larger impact on the funds you have deposited or will have to deposit: this may work against you as well as for you. You may sustain a total loss of initial margin funds and any additional funds deposited with the clearing firm to maintain your position. If the market moves against your position or margin levels are increased, you may be called upon to pay substantial additional funds on short notice to maintain your position. If you fail to comply with a request for additional funds within the time prescribed, your position may be liquidated at a loss and you will be liable for any resulting deficit. For accounts that are deemed abandoned or inactive, Striker may charge up to a \$35.00 monthly inactivity fee, depending on the clearing firm where the account is held. If the Net Liquidity of an account reaches a Daily Loss Limit of 80%, open positions will attempt to be liquidated. Clients are responsible for monitoring their positions and are financially responsible for any losses generated by open positions in the account. Striker retains its right to liquidate positions in any account, at its sole discretion, with no forewarning.

Forex Trading Disclosure:

Trading cash Foreign Exchange ("FX") contracts carries the same high level of risk as futures trading (Futures Trading Disclaimer). However cash FX, unlike futures FX contracts that are regulated by the Commodity Trading Futures Commission, are not regulated by any governmental agency. In addition, because there is not a central clearing house for cash FX transactions, there is also a counterparty risk for each contract. For additional information please read the National Futures Association ("NFA") August 2003 "Investor Alert" found on the Striker Disclaimer Page.

Definitions:

Maximum Draw Down The biggest decline of equity over a specific period of time. Peak to valley is the difference between a high point of equity and the next lowest point of equity over a number of trades on the monthly basis.

Purpose: This indicator is used to help analyze the risk of an account.

How to use: The Maximum Draw Down is a tool for the portfolio selection process. It is used as a risk measure and allows individuals to get an indication about how an account might react to a trend of falling prices.

Sharpe Ratio Measures the return earned in excess of the risk-free rate on a portfolio to the portfolio's total risk. The prior month's 90 Day T-Bill Rate is used as risk-free rate.

Purpose: Like other risk-adjusted ratios, the Sharpe Ratio compares the returns to a specific measure of risk. Here, the standard deviation is used. The Sharpe Ratio helps evaluate the potential returns in light of the underlying risk.

How to use: The Sharpe Ratio is used to evaluate the quality rather than the quantity of the returns of a security or a portfolio of securities. The higher the value of the indicator, the better the quality of the returns on a risk/reward basis.

Sterling Ratio A risk-adjusted ratio given by dividing the returns on a security by the Maximum Draw Down (the biggest consecutive loss) for the same period.

Purpose: Like other risk-adjusted ratios, the Sterling Ratio compares the returns to a specific measure of risk. Here, the Maximum Draw Down is used. The Sterling Ratio helps evaluate the potential returns on a security in light of the underlying risk.

How to use: The Sterling Ratio is used to evaluate the quality rather than the quantity of the returns on a security or a portfolio of securities. The higher the value of the indicator, the better the quality of the returns on a risk/reward basis.

System Trades Disclosure:

System Description

"System Description" is based upon information obtained from specific system marketing documents, system developers and/or system vendors themselves. While the information is believed to be reliable, we cannot guarantee its completeness or accuracy.

Actual Monthly Performance

The table and charts represent the monthly/quarterly/annual summation of actual trades based on system-specified contract(s) executed through Striker

Securities, Inc. using the referenced trading system or system vendor for the stated time period. Commissions and monthly vendor fees are deducted from the tabulation. Results are based on 1 contract. If a client trades 2 contracts his gain or loss is twice as displayed (and so on). This table is presented for information purposes only and is not a solicitation for the referenced system or vendor. The purpose of this information is for clients to compare their brokerage statements to what is displayed on Striker's site. Striker as a matter of policy has no ownership with the referenced system or vendor or any other trading system or vendor. Past trade history may not be indicative of future results. The results indicated here may or may not be typical of the performance of this system and, ALTHOUGH I WE BELIEVE THIS INFORMATION TO BE ACCURATE, STRIKER SECURITIES, INC. MAKES NO ENDORSEMENT OF THIS OR ANY SYSTEM NOR WARRANTS ITS PERFORMANCE. This is not the only trading system that Striker executes for its clients. Potential traders should carefully investigate, evaluate and compare trading systems before investing capital. Some or all trading systems may involve an inappropriate level of risk for potential traders. It is the nature of commodity trading that where there is the opportunity for profit, there is also the risk of loss. In opening an account through Striker, Customer acknowledges and agrees that he/she will rely solely upon the information that Striker provides to you. Thus, all prior third-party materials provided are superseded by the information and disclosures provided by Striker.

Important Information About this Trading System Analysis

Statistics, tables, charts and other information on trading system monthly performance are based on actual trading unless otherwise specified. Actual dollar and percentage gains/losses experienced by investors would depend on many factors not accounted for in these statistics, including, but not limited to, starting account balances, market behavior, developer fees, incidence of split fills and other variations in order execution, and the duration and extent of individual investor participation in the specified system. While the information and statistics given are believed to be complete and accurate we cannot guarantee their completeness or accuracy as they results are key punched and subject to human error. Performance information is not the performance of a single account, but a compilation of several accounts over time, and is based on the physical trading ticket. THIS INFORMATION IS PROVIDED FOR EDUCATIONAL/ INFORMATIONAL PURPOSES ONLY AND USED BY CURRENT CLIENTS TO AUDIT THEIR STATEMENTS TO STRIKER SITE. These results are not indicative of, and have no bearing on, any individual results that may be attained by the trading system in the future.

This trading system, like any other, may involve an inappropriate level of risk for prospective investors. THE RISK OF LOSS IN TRADING COMMODITY FUTURES AND OPTIONS CAN BE SUBSTANTIAL AND MAY NOT BE SUITABLE FOR ALL INVESTORS. Prior to purchasing or leasing a trading system from this or any other system vendor or investing in a trading system with a registered commodity trading representative, investors need to carefully consider whether such trading is suitable for them in light of their own specific financial condition. In some cases, futures accounts are subject to substantial charges for commission, management, incentive or advisory fees. It may be necessary for accounts subject to these charges to make substantial trading profits to avoid depletion or exhaustion of their assets. In addition, one should carefully study the accompanying prospectus, account forms, disclosure documents and/or risk disclosure statements required by the CFTC or NFA, which are provided directly by the system vendor and/or CTA's.

The information contained in this report is provided with the objective of "standardizing" trading systems measurements, and it is intended for educational /informational purposes only. All information is offered with the understanding that an investor considering purchasing or leasing a system must carry out his/her own research and due diligence in deciding whether to purchase or lease any trading system noted within or without this report. This report does not constitute a solicitation to purchase or invest in any trading system which may be mentioned herein. STRIKER SECURITIES, INC. MAKES NO ENDORSEMENT OF THIS OR ANY OTHER TRADING SYSTEM NOR WARRANTS ITS PERFORMANCE. THIS IS NOT A SOLICITATION TO PURCHASE OR SUBSCRIBE TO ANY TRADING SYSTEM.

Copyright © 1997-2018 Striker Securities, Inc. All rights reserved.

Disclaimer The risk of trading can be substantial and each investor and/or trader must consider whether this is a suitable investment. Past performance, whether actual or indicated by simulated historical tests of strategies, is not necessarily indicative of future results. Striker is a member of the National Futures Association ("NFA"), the Managed Funds Association ("MFA"), and the National Introducing Broker Association ("NIBA"). Striker is registered with the Commodity Futures Trading Commission ("CFTC"), and was formerly registered with the Securities Exchange Commission ("SEC"). Additionally, Striker is a former member of the Financial Industry Regulatory Authority ("FINRA"), and the Securities Investor Protection Corporation ("SIPC"). FINRA is the largest non-governmental regulator for all securities business in the United States. Please read Striker Disclosure Statement for the additional disclosure.

Futures Trading Disclaimer:

Transactions in securities futures, commodity and index futures and options on futures carry a high degree of risk. The amount of initial margin is small relative to the value of the futures contract, meaning that transactions are heavily "leveraged". A relatively small market movement will have a proportionately larger impact on the funds you have deposited or will have to deposit: this may work against you as well as for you. You may sustain a total loss of initial margin funds and any additional funds deposited with the clearing firm to maintain your position. If the market moves against your position or margin levels are increased, you may be called upon to pay substantial additional funds on short notice to maintain your position. If you fail to comply with a request for additional funds within the time prescribed, your position may be liquidated at a loss and you will be liable for any resulting deficit. For accounts that are deemed abandoned or inactive, Striker may charge up to a \$35.00 monthly inactivity fee, depending on the clearing firm where the account is held. If the Net Liquidity of an account reaches a Daily Loss Limit of 80%, open positions will attempt to be liquidated. Clients are responsible for monitoring their positions and are financially responsible for any losses generated by open positions in the account. Striker retains its right to liquidate positions in any account, at its sole discretion, with no forewarning.

Forex Trading Disclosure:

Trading cash Foreign Exchange ("FX") contracts carries the same high level of risk as futures trading (Futures Trading Disclaimer). However cash FX, unlike futures FX contracts that are regulated by the Commodity Trading Futures Commission, are not regulated by any governmental agency. In addition, because there is not a central clearing house for cash FX transactions, there is also a counterparty risk for each contract. For additional information please read the National Futures Association ("NFA") August 2003 "Investor Alert" found on the Striker Disclaimer Page.

System Description

Market Sector: Financials

Markets Traded: [TY](#)

System Type: Swing Trading

Risk per Trade:

Trading Rules: Not Disclosed

Suggested Capital: \$20,000

Developer Fee: \$49.00 per Month

System Description:

fractalgo SwingTrader (TY) and all other related fractalgo products are pattern recognition programs. The programs use math and physics to identify fractal patterns in the market, switching from long to short and back again when new patterns emerge. Market data, including price, volume, momentum (delta and delta of delta) and elapsed time (duration of a pattern) is absorbed from every tick for the entire history of a market. Fourier transforms are used to evenly slice that data until all segments match and wave and group velocity functions are used to project forward that pattern to determine the next trades. fractalgo SwingTrader (TY) is systematic, unemotional and completely uncorrelated to any other analysis technique.

Definitions:

Maximum Draw Down The biggest decline of equity over a specific period of time. Peak to valley is the difference between a high point of equity and the next lowest point of equity over a number of trades on the monthly basis.

Purpose: This indicator is used to help analyze the risk of an account.

How to use: The Maximum Draw Down is a tool for the portfolio selection process. It is used as a risk measure and allows individuals to get an indication about how an account might react to a trend of falling prices.

Sharpe Ratio Measures the return earned in excess of the risk-free rate on a portfolio to the portfolio's total risk. The prior month's 90 Day T-Bill Rate is used as risk-free rate.

Purpose: Like other risk adjusted ratios, the Sharpe Ratio compares the returns to a specific measure of risk. Here, the standard deviation is used. The Sharpe Ratio helps evaluate the potential returns in light of the underlying risk.

How to use: The Sharpe Ratio is used to evaluate the quality rather than the quantity of the returns of a security or a portfolio of securities. The higher the value of the indicator, the better the quality of the returns on a risk/reward basis.

Sterling Ratio A risk-adjusted ratio given by dividing the returns on a security by the Maximum Draw Down (the biggest consecutive loss) for the same period.

Purpose: Like other risk adjusted ratios, the Sterling Ratio compares the returns to a specific measure of risk. Here, the Maximum Draw Down is used.

How to use: The Sterling Ratio is used to evaluate the quality rather than the quantity of the returns on a security or a portfolio of securities. The higher the value of the indicator, the better the quality of the returns on a risk/reward basis.

System Trades Disclosure:

System Description

"System Description" is based upon information obtained from specific system marketing documents, system developers and/or system vendors themselves. While the information is believed to be reliable, we cannot guarantee its completeness or accuracy.

Actual Monthly Performance

The table and charts represent the monthly/quarterly/annual summation of actual trades based on system-specified contract(s) executed through Striker Securities, Inc. using the referenced trading system or system vendor for the stated time period. Commissions and monthly vendor fees are deducted from the tabulation. Results are based on 1 contract. If a client trades 2 contracts his gain or loss is twice as displayed (and so on). This table is presented for information purposes only and is not a solicitation for the referenced system or vendor. The purpose of this information is for clients to compare their brokerage statements to what is displayed on Striker's site. Striker as a matter of policy has no ownership with the referenced system or vendor or any other trading system or vendor. Past trade history may not be indicative of future results. The results indicated here may or may not be typical of the performance of this system and, **ALTHOUGH WE BELIEVE THIS INFORMATION TO BE ACCURATE, STRIKER SECURITIES, INC. MAKES NO ENDORSEMENT OF THIS OR ANY SYSTEM NOR WARRANTS ITS PERFORMANCE.** This is not the only trading system that Striker executes for its clients. Potential traders should carefully investigate, evaluate and compare trading systems before investing capital. Some or all trading systems may involve an inacceptable level of risk for

potential traders. It is the nature of commodity trading that where there is the opportunity for profit, there is also the risk of loss. In opening an account through Striker, Customer acknowledges and agrees that he/she will rely solely upon the information that Striker provides to you. Thus, all prior third-party materials provided are superseded by the information and disclosures provided by Striker.

Important Information About this Trading System Analysis

Statistics, tables, charts and other information on trading system monthly performance are based on actual trading unless otherwise specified. Actual dollar and percentage gains/losses experienced by investors would depend on many factors not accounted for in these statistics, including, but not limited to, starting account balances, market behavior, developer fees, incidence of split fills and other variations in order execution, and the duration and extent of individual investor participation in the specified system. While the information and statistics given are believed to be complete and accurate we cannot guarantee their completeness or accuracy as they results are key punched and subject to human error. Performance information is not the performance of a single account, but a compilation of several accounts over time, and is based on the physical trading ticket. THIS INFORMATION IS PROVIDED FOR EDUCATIONAL/ INFORMATIONAL PURPOSES ONLY AND USED BY CURRENT CLIENTS TO AUDIT THEIR STATEMENTS TO STRIKER SITE. These results are not indicative of, and have no bearing on, any individual results that may be attained by the trading system in the future.

This trading system, like any other, may involve an inappropriate level of risk for prospective investors. THE RISK OF LOSS IN TRADING COMMODITY FUTURES AND OPTIONS CAN BE SUBSTANTIAL AND MAY NOT BE SUITABLE FOR ALL INVESTORS. Prior to purchasing or leasing a trading system from this or any other system vendor or investing in a trading system with a registered commodity trading representative, investors need to carefully consider whether such trading is suitable for them in light of their own specific financial condition. In some cases, futures accounts are subject to substantial charges for commission, management, incentive or advisory fees. It may be necessary for accounts subject to these charges to make substantial trading profits to avoid depletion or exhaustion of their assets. In addition, one should carefully study the accompanying prospectus, account forms, disclosure documents and/or risk disclosure statements required by the CFTC or NFA, which are provided directly by the system vendor and/or CTA's.

The information contained in this report is provided with the objective of "standardizing" trading systems measurements, and it is intended for educational /informational purposes only. MAKES NO ENDORSEMENT OF THIS OR ANY OTHER TRADING SYSTEM NOR WARRANTS ITS PERFORMANCE. THIS IS NOT A SOLICITATION TO PURCHASE OR SUBSCRIBE TO ANY TRADING SYSTEM.

Copyright © 1997-2018 Striker Securities, Inc. All rights reserved.

Disclaimer The risk of trading can be substantial and each investor and/or trader must consider whether this is a suitable investment. Past performance, whether actual or indicated by simulated historical tests of strategies, is not necessarily indicative of future results. Striker is a member of the National Futures Association ("NFA"), the Managed Funds Association ("MFA"), and the National Introducing Broker Association ("NIBA"). Striker is registered with the Commodity Futures Trading Commission ("CFTC"), and was formerly registered with the Securities Exchange Commission ("SEC"). Additionally, Striker is a former member of the Financial Industry Regulatory Authority ("FINRA"), and the Securities Investor Protection Corporation ("SIPC"). FINRA is the largest non-governmental regulator for all securities business in the United States. Please read Striker Disclosure Statement for the additional disclosure.

Futures Trading Disclaimer:

Transactions in securities futures, commodity and index futures and options on futures carry a high degree of risk. The amount of initial margin is small relative to the value of the futures contract, meaning that transactions are heavily "leveraged". A relatively small market movement will have a proportionately larger impact on the funds you have deposited or will have to deposit: this may work against you as well as for you. You may sustain a total loss of initial margin funds and any additional funds deposited with the clearing firm to maintain your position. If the market moves against your position or margin levels are increased, you may be called upon to pay substantial additional funds on short notice to maintain your position. If you fail to comply with a request for additional funds within the time prescribed, your position may be liquidated at a loss and you will be liable for any resulting deficit. For accounts that are deemed abandoned or inactive, Striker may charge up to a \$35.00 monthly inactivity fee, depending on the clearing firm where the account is held. If the Net Liquidity of an account reaches a Daily Loss Limit of 80%, open positions will attempt to be liquidated. Clients are responsible for monitoring their positions and are financially responsible for any losses generated by open positions in the account. Striker retains its right to liquidate positions in any account, at its sole discretion, with no forewarning.

Forex Trading Disclosure:

Trading cash Foreign Exchange ("FX") contracts carries the same high level of risk as futures trading (Futures Trading Disclaimer). However cash FX, unlike futures FX contracts that are regulated by the Commodity Trading Futures Commission, are not regulated by any governmental agency. In addition, because there is not a central clearing house for cash FX transactions, there is also a counterparty risk for each contract. For additional information please read the National Futures Association ("NFA") August 2003 "Investor Alert" found on the Striker Disclaimer Page.

Maximum Draw Down The biggest decline of equity over a specific period of time. Peak to valley is the difference between a high point of equity and the next lowest point of equity over a number of trades on the monthly basis.

Purpose: This indicator is used to help analyze the risk of an account.

How to use: The Maximum Draw Down is a tool for the portfolio selection process. It is used as a risk measure and allows individuals to get an indication about how an account might react to a trend of falling prices.

Sharpe Ratio Measures the return earned in excess of the risk-free rate on a portfolio to the portfolio's total risk. The prior month's 90 Day T-Bill Rate is used as risk-free rate.

Purpose: Like other risk-adjusted ratios, the Sharpe Ratio compares the returns to a specific measure of risk. Here, the standard deviation is used. The Sharpe Ratio helps evaluate the potential returns in light of the underlying risk.

How to use: The Sharpe Ratio is used to evaluate the quality rather than the quantity of the returns of a security or a portfolio of securities. The higher the value of the indicator, the better the quality of the returns on a risk/reward basis.

Sterling Ratio A risk-adjusted ratio given by dividing the returns on a security by the Maximum Draw Down (the biggest consecutive loss) for the same period.

Purpose: Like other risk-adjusted ratios, the Sterling Ratio compares the returns to a specific measure of risk. Here, the Maximum Draw Down is used. The Sterling Ratio helps evaluate the potential returns on a security in light of the underlying risk.

How to use: The Sterling Ratio is used to evaluate the quality rather than the quantity of the returns on a security or a portfolio of securities. The higher the value of the indicator, the better the quality of the returns on a risk/reward basis.

System Trades Disclosure:

System Description

"System Description" is based upon information obtained from specific system marketing documents, system developers and/or system vendors themselves. While the information is believed to be reliable, we cannot guarantee its completeness or accuracy.

Actual Monthly Performance

The table and charts represent the monthly/quarterly/annual summation of actual trades based on system-specified contract(s) executed through Striker Securities, Inc. using the referenced trading system or system vendor for the stated time period. Commissions and monthly vendor fees are deducted from the tabulation. Results are based on 1 contract. If a client trades 2 contracts his gain or loss is twice as displayed (and so on). This table is presented for information purposes only and is not a solicitation for the referenced system or vendor. The purpose of this information is for clients to compare their brokerage statements to what is displayed on Striker's site. Striker as a matter of policy has no ownership with the referenced system or vendor or any other trading system or vendor. Past trade history may not be indication of future results. The results indicated here may or may not be typical of the performance of

trading system or vendor's past trading history may not be indicative of future results. The trading information shown may or may not be typical of the performance of this system and, ALTHOUGH WE BELIEVE THIS INFORMATION TO BE ACCURATE, STRIKER SECURITIES, INC. MAKES NO ENDORSEMENT OF THIS OR ANY SYSTEM NOR WARRANTS ITS PERFORMANCE. This is not the only trading system that Striker executes for its clients. Potential traders should carefully investigate, evaluate and compare trading systems before investing capital. Some or all trading systems may involve an inappropriate level of risk for potential traders. It is the nature of commodity trading that where there is the opportunity for profit, there is also the risk of loss. In opening an account through Striker, Customer acknowledges and agrees that he/she will rely solely upon the information that Striker provides to you. Thus, all prior third-party materials provided are superseded by the information and disclosures provided by Striker.

Important Information About this Trading System Analysis

Statistics, tables, charts and other information on trading system monthly performance are based on actual trading unless otherwise specified. Actual dollar and percentage gains/losses experienced by investors would depend on many factors not accounted for in these statistics, including, but not limited to, starting account balances, market behavior, developer fees, incidence of split fills and other variations in order execution, and the duration and extent of individual investor participation in the specified system. While the information and statistics given are believed to be complete and accurate we cannot guarantee their completeness or accuracy as they results are key punched and subject to human error. Performance information is not the performance of a single account, but a compilation of several accounts over time, and is based on the physical trading ticket. THIS INFORMATION IS PROVIDED FOR EDUCATIONAL INFORMATIONAL PURPOSES ONLY AND USED BY CURRENT CLIENTS TO AUDIT THEIR STATEMENTS TO STRIKER SITE. These results are not indicative of, and have no bearing on, any individual results that may be attained by the trading system in the future.

This trading system, like any other, may involve an inappropriate level of risk for prospective investors. THE RISK OF LOSS IN TRADING COMMODITY FUTURES AND OPTIONS CAN BE SUBSTANTIAL AND MAY NOT BE SUITABLE FOR ALL INVESTORS. Prior to purchasing or leasing a trading system from this or any other system vendor or investing in a trading system with a registered commodity trading representative, investors need to carefully consider whether such trading is suitable for them in light of their own specific financial condition. In some cases, futures accounts are subject to substantial charges for commission, management, incentive or advisory fees. It may be necessary for accounts subject to these charges to make substantial trading profits to avoid depletion or exhaustion of their assets. In addition, one should carefully study the accompanying prospectus, account forms, disclosure documents and/or risk disclosure statements required by the CFTC or NFA, which are provided directly by the system vendor and/or CTA's.

The information contained in this report is provided with the objective of "standardizing" trading systems measurements, and it is intended for educational /informational purposes only. All information is offered with the understanding that an investor considering purchasing or leasing a system must carry out his/her own research and due diligence in deciding whether to purchase or lease any trading system noted within or without this report. This report does not constitute a solicitation to purchase or invest in any trading system which may be mentioned herein. STRIKER SECURITIES, INC. MAKES NO ENDORSEMENT OF THIS OR ANY OTHER TRADING SYSTEM NOR WARRANTS ITS PERFORMANCE. THIS IS NOT A SOLICITATION TO PURCHASE OR SUBSCRIBE TO ANY TRADING SYSTEM.

Copyright © 1997-2018 Striker Securities, Inc. All rights reserved.

Disclaimer The risk of trading can be substantial and each investor and/or trader must consider whether this is a suitable investment. Past performance, whether actual or indicated by simulated historical tests of strategies, is not necessarily indicative of future results. Striker is a member of the National Futures Association ("NFA"), the Managed Funds Association ("MFA"), and the National Introducing Broker Association ("NIBA"). Striker is registered with the Commodity Futures Trading Commission ("CFTC"), and was formerly registered with the Securities Exchange Commission ("SEC"). Additionally, Striker is a former member of the Financial Industry Regulatory Authority ("FINRA"), and the Securities Investor Protection Corporation ("SIPC"). FINRA is the largest non-governmental regulator for all securities business in the United States. Please read Striker Disclosure Statement for the additional disclosure.

Futures Trading Disclaimer:

Transactions in securities futures, commodity and index futures and options on futures carry a high degree of risk. The amount of initial margin is small relative to the value of the futures contract, meaning that transactions are heavily "leveraged". A relatively small market movement will have a proportionately larger impact on the funds you have deposited or will have to deposit: this may work against you as well as for you. You may sustain a total loss of initial margin funds and any additional funds deposited with the clearing firm to maintain your position. If the market moves against your position or margin levels are increased, you may be called upon to pay substantial additional funds on short notice to maintain your position. If you fail to comply with a request for additional funds within the time prescribed, your position may be liquidated at a loss and you will be liable for any resulting deficit. For accounts that are deemed abandoned or inactive, Striker may charge up to a \$35.00 monthly inactivity fee, depending on the clearing firm where the account is held. If the Net Liquidity of an account reaches a Daily Loss Limit of 80%, open positions will attempt to be liquidated. Clients are responsible for monitoring their positions and are financially responsible for any losses generated by open positions in the account. Striker retains its right to liquidate positions in any account, at its sole discretion, with no forewarning.

Forex Trading Disclosure:

Trading cash Foreign Exchange ("FX") contracts carries the same high level of risk as futures trading (Futures Trading Disclaimer). However cash FX, unlike futures FX contracts that are regulated by the Commodity Trading Futures Commission, are not regulated by any governmental agency. In addition, because there is not a central clearing house for cash FX transactions, there is also a counterparty risk for each contract. For additional information please read the National Futures Association ("NFA") August 2003 "Investor Alert" found on the Striker Disclaimer Page.

Markets Traded: [W](#)

System Type: Swing Trading

Risk per Trade: varies

Trading Rules: Not Disclosed

Suggested Capital: \$46,000

Developer Fee: \$149.00 per Month

System Description:

fractalgo SwingTrader (W) and all other related fractalgo products are pattern recognition programs. The programs use math and physics to identify fractal patterns in the market, switching from long to short and back again when new patterns emerge. Market data, including price, volume, momentum (delta and delta of delta) and elapsed time (duration of a pattern) is absorbed from every tick for the entire history of a market. Fourier transforms are used to evenly slice that data until all segments match and wave and group velocity functions are used to project forward that pattern to determine the next trades. fractalgo SwingTrader (W) is systematic, unemotional and completely uncorrelated to any other analysis technique.

Maximum Draw Down The biggest decline of equity over a specific period of time. Peak to valley is the difference between a high point of equity and the next lowest point of equity over a number of trades on the monthly basis.

Purpose: This indicator is used to help analyze the risk of an account.

How to use: The Maximum Draw Down is a tool for the portfolio selection process. It is used as a risk measure and allows individuals to get an indication about how an account might react to a trend of falling prices.

Sharpe Ratio Measures the return earned in excess of the risk-free rate on a portfolio to the portfolio's total risk. The prior month's 90 Day T-Bill Rate is used as risk free rate.

Purpose: Like other risk-adjusted ratios, the Sharpe Ratio compares the returns to a specific measure of risk. Here, the standard deviation is used. The Sharpe Ratio helps evaluate the potential returns in light of the underlying risk.

How to use: The Sharpe Ratio is used to evaluate the quality rather than the quantity of the returns of a security or a portfolio of securities. The higher the value of the indicator, the better the quality of the returns on a risk/reward basis.

Sterling Ratio A risk-adjusted ratio given by dividing the returns on a security by the Maximum Draw Down (the biggest consecutive loss) for the same period.

Purpose: Like other risk-adjusted ratios, the Sterling Ratio compares the returns to a specific measure of risk. Here, the Maximum Draw Down is used. The Sterling Ratio helps evaluate the potential returns on a security in light of the underlying risk.

How to use: The Sterling Ratio is used to evaluate the quality rather than the quantity of the returns on a security or a portfolio of securities. The higher the value of the indicator, the better the quality of the returns on a risk/reward basis.

System Trades Disclosure:

System Description

"System Description" is based upon information obtained from specific system marketing documents, system developers and/or system vendors themselves. While the information is believed to be reliable, we cannot guarantee its completeness or accuracy.

Actual Monthly Performance

The table and charts represent the monthly/quarterly/annual summation of actual trades based on system-specified contract(s) executed through Striker Securities, Inc. using the referenced trading system or system vendor for the stated time period. Commissions and monthly vendor fees are deducted from the tabulation. Results are based on 1 contract. If a client trades 2 contracts his gain or loss is twice as displayed (and so on). This table is presented for information purposes only and is not a solicitation for the referenced system or vendor. The purpose of this information is for clients to compare their brokerage statements to what is displayed on Striker's site. Striker as a matter of policy has no ownership with the referenced system or vendor or any other trading system or vendor. Past trade history may not be indication of future results. The results indicated here may or may not be typical of the performance of

trading system or vendor's past trading history may not be indicative of future results. The trading information shown may or may not be typical of the performance of this system and, ALTHOUGH WE BELIEVE THIS INFORMATION TO BE ACCURATE, STRIKER SECURITIES, INC. MAKES NO ENDORSEMENT OF THIS OR ANY SYSTEM NOR WARRANTS ITS PERFORMANCE. This is not the only trading system that Striker executes for its clients. Potential traders should carefully investigate, evaluate and compare trading systems before investing capital. Some or all trading systems may involve an inappropriate level of risk for potential traders. It is the nature of commodity trading that where there is the opportunity for profit, there is also the risk of loss. In opening an account through Striker, Customer acknowledges and agrees that he/she will rely solely upon the information that Striker provides to you. Thus, all prior third-party materials provided are superseded by the information and disclosures provided by Striker.

Important Information About this Trading System Analysis

Statistics, tables, charts and other information on trading system monthly performance are based on actual trading unless otherwise specified. Actual dollar and percentage gains/losses experienced by investors would depend on many factors not accounted for in these statistics, including, but not limited to, starting account balances, market behavior, developer fees, incidence of split fills and other variations in order execution, and the duration and extent of individual investor participation in the specified system. While the information and statistics given are believed to be complete and accurate we cannot guarantee their completeness or accuracy as they results are key punched and subject to human error. Performance information is not the performance of a single account, but a compilation of several accounts over time, and is based on the physical trading ticket. THIS INFORMATION IS PROVIDED FOR EDUCATIONAL INFORMATIONAL PURPOSES ONLY AND USED BY CURRENT CLIENTS TO AUDIT THEIR STATEMENTS TO STRIKER SITE. These results are not indicative of, and have no bearing on, any individual results that may be attained by the trading system in the future.

This trading system, like any other, may involve an inappropriate level of risk for prospective investors. THE RISK OF LOSS IN TRADING COMMODITY FUTURES AND OPTIONS CAN BE SUBSTANTIAL AND MAY NOT BE SUITABLE FOR ALL INVESTORS. Prior to purchasing or leasing a trading system from this or any other system vendor or investing in a trading system with a registered commodity trading representative, investors need to carefully consider whether such trading is suitable for them in light of their own specific financial condition. In some cases, futures accounts are subject to substantial charges for commission, management, incentive or advisory fees. It may be necessary for accounts subject to these charges to make substantial trading profits to avoid depletion or exhaustion of their assets. In addition, one should carefully study the accompanying prospectus, account forms, disclosure documents and/or risk disclosure statements required by the CFTC or NFA, which are provided directly by the system vendor and/or CTA's.

The information contained in this report is provided with the objective of "standardizing" trading systems measurements, and it is intended for educational /informational purposes only. All information is offered with the understanding that an investor considering purchasing or leasing a system must carry out his/her own research and due diligence in deciding whether to purchase or lease any trading system noted within or without this report. This report does not constitute a solicitation to purchase or invest in any trading system which may be mentioned herein. STRIKER SECURITIES, INC. MAKES NO ENDORSEMENT OF THIS OR ANY OTHER TRADING SYSTEM NOR WARRANTS ITS PERFORMANCE. THIS IS NOT A SOLICITATION TO PURCHASE OR SUBSCRIBE TO ANY TRADING SYSTEM.

Copyright © 1997-2018 Striker Securities, Inc. All rights reserved.

Disclaimer The risk of trading can be substantial and each investor and/or trader must consider whether this is a suitable investment. Past performance, whether actual or indicated by simulated historical tests of strategies, is not necessarily indicative of future results. Striker is a member of the National Futures Association ("NFA"), the Managed Funds Association ("MFA"), and the National Introducing Broker Association ("NIBA"). Striker is registered with the Commodity Futures Trading Commission ("CFTC"), and was formerly registered with the Securities Exchange Commission ("SEC"). Additionally, Striker is a former member of the Financial Industry Regulatory Authority ("FINRA"), and the Securities Investor Protection Corporation ("SIPC"). FINRA is the largest non-governmental regulator for all securities business in the United States. Please read Striker Disclosure Statement for the additional disclosure.

Futures Trading Disclaimer:

Transactions in securities futures, commodity and index futures and options on futures carry a high degree of risk. The amount of initial margin is small relative to the value of the futures contract, meaning that transactions are heavily "leveraged". A relatively small market movement will have a proportionately larger impact on the funds you have deposited or will have to deposit: this may work against you as well as for you. You may sustain a total loss of initial margin funds and any additional funds deposited with the clearing firm to maintain your position. If the market moves against your position or margin levels are increased, you may be called upon to pay substantial additional funds on short notice to maintain your position. If you fail to comply with a request for additional funds within the time prescribed, your position may be liquidated at a loss and you will be liable for any resulting deficit. For accounts that are deemed abandoned or inactive, Striker may charge up to a \$35.00 monthly inactivity fee, depending on the clearing firm where the account is held. If the Net Liquidity of an account reaches a Daily Loss Limit of 80%, open positions will attempt to be liquidated. Clients are responsible for monitoring their positions and are financially responsible for any losses generated by open positions in the account. Striker retains its right to liquidate positions in any account, at its sole discretion, with no forewarning.

Forex Trading Disclosure:

Trading cash Foreign Exchange ("FX") contracts carries the same high level of risk as futures trading (Futures Trading Disclaimer). However cash FX, unlike futures FX contracts that are regulated by the Commodity Trading Futures Commission, are not regulated by any governmental agency. In addition, because there is not a central clearing house for cash FX transactions, there is also a counterparty risk for each contract. For additional information please read the National Futures Association ("NFA") August 2003 "Investor Alert" found on the Striker Disclaimer Page.

System Description

Market Sector: Grains

Markets Traded: C

System Type: Swing Trading

Risk per Trade: varies

Trading Rules: Not Disclosed

Suggested Capital: \$13,000

Developer Fee: \$79.00 per Month

System Description:

fractalgo SwingTrader (C) and all other related fractalgo products are pattern recognition programs. The programs use math and physics to identify fractal patterns in the market, switching from long to short and back again when new patterns emerge. Market data, including price, volume, momentum (delta and delta of delta) and elapsed time (duration of a pattern) is absorbed from every tick for the entire history of a market. Fourier transforms are used to evenly slice that data until all segments match and wave and group velocity functions are used to project forward that pattern to determine the next trades. fractalgo SwingTrader (C) is systematic, unemotional and completely uncorrelated to any other analysis technique.

Statistical Summary

fractalgo SwingTrader (C)	Tracked Since: August 12, 2016
Profit/Loss Total:	(\$437.86)
Avg Annual Profit/Loss:	(\$262.72)
Total # of Trades:	51
Winning # of Trades:	25
Average Winning:	\$400.50
Average Losing:	(\$316.83)
Max Month-to-Month DrawDown*:	(\$2,665.18) Jul. 17 to Jan. 18

Definitions:

Maximum Draw Down The biggest decline of equity over a specific period of time. Peak to valley is the difference between a high point of equity and the next lowest point of equity over a number of trades on the monthly basis.

Purpose: This indicator is used to help analyze the risk of an account.

How to use: The Maximum Draw Down is a tool for the portfolio selection process. It is used as a risk measure and allows individuals to get an indication about how an account might react to a trend of falling prices.

Sharpe Ratio Measures the return earned in excess of the risk-free rate on a portfolio to the portfolio's total risk. The prior month's 90 Day T-Bill Rate is used as risk free rate.

Purpose: Like other risk-adjusted ratios, the Sharpe Ratio compares the returns to a specific measure of risk. Here, the standard deviation is used. The Sharpe Ratio helps evaluate the potential returns in light of the underlying risk.

How to use: The Sharpe Ratio is used to evaluate the quality rather than the quantity of the returns of a security or a portfolio of securities. The higher the value of the indicator, the better the quality of the returns on a risk/reward basis.

Sterling Ratio A risk-adjusted ratio given by dividing the returns on a security by the Maximum Draw Down (the biggest consecutive loss) for the same period.

Purpose: Like other risk-adjusted ratios, the Sterling Ratio compares the returns to a specific measure of risk. Here, the Maximum Draw Down is used. The Sterling Ratio helps evaluate the potential returns on a security in light of the underlying risk.

How to use: The Sterling Ratio is used to evaluate the quality rather than the quantity of the returns on a security or a portfolio of securities. The higher the value of the indicator, the better the quality of the returns on a risk/reward basis.

System Trades Disclosure:

System Description

"System Description" is based upon information obtained from specific system marketing documents, system developers and/or system vendors themselves. While the information is believed to be reliable, we cannot guarantee its completeness or accuracy.

Actual Monthly Performance

The table and charts represent the monthly/quarterly/annual summation of actual trades based on system-specified contract(s) executed through Striker Securities, Inc. using the referenced trading system or system vendor for the stated time period. Commissions and monthly vendor fees are deducted from the tabulation. Results are based on 1 contract. If a client trades 2 contracts his gain or loss is twice as displayed (and so on). This table is presented for information purposes only and is not a solicitation for the referenced system or vendor. The purpose of this information is for clients to compare their brokerage statements to what is displayed on Striker's site. Striker as a matter of policy has no ownership with the referenced system or vendor or any other trading system or vendor. Past trade history may not be indication of future results. The results indicated here may or may not be typical of the performance of

trading system or vendor's past trading history may not be indicative of future results. The trading information shown may or may not be typical of the performance of this system and, ALTHOUGH WE BELIEVE THIS INFORMATION TO BE ACCURATE, STRIKER SECURITIES, INC. MAKES NO ENDORSEMENT OF THIS OR ANY SYSTEM NOR WARRANTS ITS PERFORMANCE. This is not the only trading system that Striker executes for its clients. Potential traders should carefully investigate, evaluate and compare trading systems before investing capital. Some or all trading systems may involve an inappropriate level of risk for potential traders. It is the nature of commodity trading that where there is the opportunity for profit, there is also the risk of loss. In opening an account through Striker, Customer acknowledges and agrees that he/she will rely solely upon the information that Striker provides to you. Thus, all prior third-party materials provided are superseded by the information and disclosures provided by Striker.

Disclaimer The risk of trading can be substantial and each investor and/or trader must consider whether this is a suitable investment. Past performance, whether actual or indicated by simulated historical tests of strategies, is not necessarily indicative of future results. Striker is a member of the National Futures Association ("NFA"), the Managed Funds Association ("MFA"), and the National Introducing Broker Association ("NIBA"). Striker is registered with the Commodity Futures Trading Commission ("CFTC"), and was formerly registered with the Securities Exchange Commission ("SEC"). Additionally, Striker is a former member of the Financial Industry Regulatory Authority ("FINRA"), and the Securities Investor Protection Corporation ("SIPC"). FINRA is the largest non-governmental regulator for all securities business in the United States. Please read Striker Disclosure Statement for the additional disclosure.

Futures Trading Disclaimer:

Transactions in securities futures, commodity and index futures and options on futures carry a high degree of risk. The amount of initial margin is small relative to the value of the futures contract, meaning that transactions are heavily "leveraged". A relatively small market movement will have a proportionately larger impact on the funds you have deposited or will have to deposit: this may work against you as well as for you. You may sustain a total loss of initial margin funds and any additional funds deposited with the clearing firm to maintain your position. If the market moves against your position or margin levels are increased, you may be called upon to pay substantial additional funds on short notice to maintain your position. If you fail to comply with a request for additional funds within the time prescribed, your position may be liquidated at a loss and you will be liable for any resulting deficit. For accounts that are deemed abandoned or inactive, Striker may charge up to a \$35.00 monthly inactivity fee, depending on the clearing firm where the account is held. If the Net Liquidity of an account reaches a Daily Loss Limit of 80%, open positions will attempt to be liquidated. Clients are responsible for monitoring their positions and are financially responsible for any losses generated by open positions in the account. Striker retains its right to liquidate positions in any account, at its sole discretion, with no forewarning.

Forex Trading Disclosure:

Trading cash Foreign Exchange ("FX") contracts carries the same high level of risk as futures trading (Futures Trading Disclaimer). However cash FX, unlike futures FX contracts that are regulated by the Commodity Trading Futures Commission, are not regulated by any governmental agency. In addition, because there is not a central clearing house for cash FX transactions, there is also a counterparty risk for each contract. For additional information please read the National Futures Association ("NFA") August 2003 "Investor Alert" found on the Striker Disclaimer Page.

fractalgo SwingTrader (CL) Trading System

To learn more about this system,
Call 800.669.8838/312.987.0043 or [Email us](#).

Developer: fractalgo.com

Profit and Loss as shown below is not necessarily representative of a single account, but is a compilation of several accounts over time, and is based on the physical trade ticket. These results are based on 1 contract, with a starting balance of \$37,000. Monthly subscription \$299 and commission \$25/RT along with all fees are included in the profit/loss calculation. The risk of loss in trading commodity futures and options can be substantial and may not be suitable for all investors.

System Description

Market Sector: Energies

Markets Traded: CL

System Type: Swing Trading

Risk per Trade: Varies

Trading Rules: Not Disclosed

Suggested Capital: \$37,000

Developer Fee: \$299.00 per Month

System Description:

fractalgo SwingTrader (CL) and all other related fractalgo products are pattern recognition programs. The programs use math and physics to identify fractal patterns in the market, switching from long to short and back again when new patterns emerge. Market data, including price, volume, momentum (delta and delta of delta) and elapsed time (duration of a pattern) is absorbed from every tick for the entire history of a market. Fourier transforms are used to evenly slice that data until all segments match and wave and group velocity functions are used to project forward that pattern to determine the next trades. fractalgo SwingTrader (CL) is systematic, unemotional and completely uncorrelated to any other analysis technique.

Statistical Summary

fractalgo SwingTrader (CL)	Tracked Since: November 09, 2016

Definitions:

Maximum Draw Down The biggest decline of equity over a specific period of time. Peak to valley is the difference between a high point of equity and the next lowest point of equity over a number of trades on the monthly basis.

Purpose: This indicator is used to help analyze the risk of an account.

How to use: The Maximum Draw Down is a tool for the portfolio selection process. It is used as a risk measure and allows individuals to get an indication about how an account might react to a trend of falling prices.

Sharpe Ratio Measures the return earned in excess of the risk-free rate on a portfolio to the portfolio's total risk. The prior month's 90 Day T-Bill Rate is used as risk-free rate.

Purpose: Like other risk-adjusted ratios, the Sharpe Ratio compares the returns to a specific measure of risk. Here, the standard deviation is used. The Sharpe Ratio helps evaluate the potential returns in light of the underlying risk.

How to use: The Sharpe Ratio is used to evaluate the quality rather than the quantity of the returns of a security or a portfolio of securities. The higher the value of the indicator, the better the quality of the returns on a risk/reward basis.

Sterling Ratio A risk-adjusted ratio given by dividing the returns on a security by the Maximum Draw Down (the biggest consecutive loss) for the same period.

Purpose: Like other risk-adjusted ratios, the Sterling Ratio compares the returns to a specific measure of risk. Here, the Maximum Draw Down is used. The Sterling Ratio helps evaluate the potential returns on a security in light of the underlying risk.

How to use: The Sterling Ratio is used to evaluate the quality rather than the quantity of the returns on a security or a portfolio of securities. The higher the value of the indicator, the better the quality of the returns on a risk/reward basis.

System Trades Disclosure:

System Description

"System Description" is based upon information obtained from specific system marketing documents, system developers and/or system vendors themselves. While the information is believed to be reliable, we cannot guarantee its completeness or accuracy.

Actual Monthly Performance

The table and charts represent the monthly/quarterly/annual summation of actual trades based on system-specified contract(s) executed through Striker

Securities, Inc. using the referenced trading system or system vendor for the stated time period. Commissions and monthly vendor fees are deducted from the tabulation. Results are based on 1 contract. If a client trades 2 contracts his gain or loss is twice as displayed (and so on). This table is presented for information purposes only and is not a solicitation for the referenced system or vendor. The purpose of this information is for clients to compare their brokerage statements to what is displayed on Striker's site. Striker as a matter of policy has no ownership with the referenced system or vendor or any other trading system or vendor. Past trade history may not be indicative of future results. The results indicated here may or may not be typical of the performance of this system and, ALTHOUGH I WE BELIEVE THIS INFORMATION TO BE ACCURATE, STRIKER SECURITIES, INC. MAKES NO ENDORSEMENT OF THIS OR ANY SYSTEM NOR WARRANTS ITS PERFORMANCE. This is not the only trading system that Striker executes for its clients. Potential traders should carefully investigate, evaluate and compare trading systems before investing capital. Some or all trading systems may involve an inappropriate level of risk for potential traders. It is the nature of commodity trading that where there is the opportunity for profit, there is also the risk of loss. In opening an account through Striker, Customer acknowledges and agrees that he/she will rely solely upon the information that Striker provides to you. Thus, all prior third-party materials provided are superseded by the information and disclosures provided by Striker.

Important Information About this Trading System Analysis

Statistics, tables, charts and other information on trading system monthly performance are based on actual trading unless otherwise specified. Actual dollar and percentage gains/losses experienced by investors would depend on many factors not accounted for in these statistics, including, but not limited to, starting account balances, market behavior, developer fees, incidence of split fills and other variations in order execution, and the duration and extent of individual investor participation in the specified system. While the information and statistics given are believed to be complete and accurate we cannot guarantee their completeness or accuracy as they results are key punched and subject to human error. Performance information is not the performance of a single account, but a compilation of several accounts over time, and is based on the physical trading ticket. THIS INFORMATION IS PROVIDED FOR EDUCATIONAL/ INFORMATIONAL PURPOSES ONLY AND USED BY CURRENT CLIENTS TO AUDIT THEIR STATEMENTS TO STRIKER SITE. These results are not indicative of, and have no bearing on, any individual results that may be attained by the trading system in the future.

This trading system, like any other, may involve an inappropriate level of risk for prospective investors. THE RISK OF LOSS IN TRADING COMMODITY FUTURES AND OPTIONS CAN BE SUBSTANTIAL AND MAY NOT BE SUITABLE FOR ALL INVESTORS. Prior to purchasing or leasing a trading system from this or any other system vendor or investing in a trading system with a registered commodity trading representative, investors need to carefully consider whether such trading is suitable for them in light of their own specific financial condition. In some cases, futures accounts are subject to substantial charges for commission, management, incentive or advisory fees. It may be necessary for accounts subject to these charges to make substantial trading profits to avoid depletion or exhaustion of their assets. In addition, one should carefully study the accompanying prospectus, account forms, disclosure documents and/or risk disclosure statements required by the CFTC or NFA, which are provided directly by the system vendor and/or CTA's.

The information contained in this report is provided with the objective of "standardizing" trading systems measurements, and it is intended for educational /informational purposes only. All information is offered with the understanding that an investor considering purchasing or leasing a system must carry out his/her own research and due diligence in deciding whether to purchase or lease any trading system noted within or without this report. This report does not constitute a solicitation to purchase or invest in any trading system which may be mentioned herein. STRIKER SECURITIES, INC. MAKES NO ENDORSEMENT OF THIS OR ANY OTHER TRADING SYSTEM NOR WARRANTS ITS PERFORMANCE. THIS IS NOT A SOLICITATION TO PURCHASE OR SUBSCRIBE TO ANY TRADING SYSTEM.

Copyright © 1997-2018 Striker Securities, Inc. All rights reserved.

Disclaimer The risk of trading can be substantial and each investor and/or trader must consider whether this is a suitable investment. Past performance, whether actual or indicated by simulated historical tests of strategies, is not necessarily indicative of future results. Striker is a member of the National Futures Association ("NFA"), the Managed Funds Association ("MFA"), and the National Introducing Broker Association ("NIBA"). Striker is registered with the Commodity Futures Trading Commission ("CFTC"), and was formerly registered with the Securities Exchange Commission ("SEC"). Additionally, Striker is a former member of the Financial Industry Regulatory Authority ("FINRA"), and the Securities Investor Protection Corporation ("SIPC"). Profit and Loss as shown below is not necessarily representative of a single account, but is a compilation of several accounts over time, and is based on the physical trade ticket. These results are based on 1 contract, with a starting balance of \$31,000. Monthly subscription \$119 and commission \$30/RT along with all fees are included in the profit/loss calculation. The risk of loss in trading commodity futures and options can be substantial and may not be suitable for all investors.

System Description

Market Sector: Livestock

Markets Traded: FC

System Type: Swing Trading

Risk per Trade: Varies

Trading Rules: Not Disclosed

Suggested Capital: \$31,000

Developer Fee: \$119.00 per Month

System Description:

fractalgo SwingTrader (FC) and all other related fractalgo products are pattern recognition programs. The programs use math and physics to identify fractal patterns in the market, switching from long to short and back again when new patterns emerge. Market data, including price, volume, momentum (delta and delta of delta) and elapsed time (duration of a pattern) is absorbed from every tick for the entire history of a market. Fourier transforms are used to evenly slice that data until all segments match and wave and group velocity functions are used to project forward that pattern to determine the next trades. fractalgo SwingTrader (FC) is systematic, unemotional and completely uncorrelated to any other analysis technique.

Statistical Summary

fractalgo SwingTrader (FC)	Tracked Since: November 04, 2016

Definitions:

Maximum Draw Down The biggest decline of equity over a specific period of time. Peak to valley is the difference between a high point of equity and the next lowest point of equity over a number of trades on the monthly basis.

Purpose: This indicator is used to help analyze the risk of an account.

How to use: The Maximum Draw Down is a tool for the portfolio selection process. It is used as a risk measure and allows individuals to get an indication about how an account might react to a trend of falling prices.

Sharpe Ratio Measures the return earned in excess of the risk-free rate on a portfolio to the portfolio's total risk. The prior month's 90 Day T-Bill Rate is used as risk-free rate.

Purpose: Like other risk-adjusted ratios, the Sharpe Ratio compares the returns to a specific measure of risk. Here, the standard deviation is used. The Sharpe Ratio helps evaluate the potential returns in light of the underlying risk.

How to use: The Sharpe Ratio is used to evaluate the quality rather than the quantity of the returns of a security or a portfolio of securities. The higher the value of the indicator, the better the quality of the returns on a risk/reward basis.

Sterling Ratio A risk-adjusted ratio given by dividing the returns on a security by the Maximum Draw Down (the biggest consecutive loss) for the same period.

Purpose: Like other risk-adjusted ratios, the Sterling Ratio compares the returns to a specific measure of risk. Here, the Maximum Draw Down is used. The Sterling Ratio helps evaluate the potential returns on a security in light of the underlying risk.

How to use: The Sterling Ratio is used to evaluate the quality rather than the quantity of the returns on a security or a portfolio of securities. The higher the value of the indicator, the better the quality of the returns on a risk/reward basis.

System Trades Disclosure:

System Description

"System Description" is based upon information obtained from specific system marketing documents, system developers and/or system vendors themselves. While the information is believed to be reliable, we cannot guarantee its completeness or accuracy.

Actual Monthly Performance

The table and charts represent the monthly/quarterly/annual summation of actual trades based on system-specified contract(s) executed through Striker

Securities, Inc. using the referenced trading system or system vendor for the stated time period. Commissions and monthly vendor fees are deducted from the tabulation. Results are based on 1 contract. If a client trades 2 contracts his gain or loss is twice as displayed (and so on). This table is presented for information purposes only and is not a solicitation for the referenced system or vendor. The purpose of this information is for clients to compare their brokerage statements to what is displayed on Striker's site. Striker as a matter of policy has no ownership with the referenced system or vendor or any other trading system or vendor. Past trade history may not be indicative of future results. The results indicated here may or may not be typical of the performance of this system and, ALTHOUGH I WE BELIEVE THIS INFORMATION TO BE ACCURATE, STRIKER SECURITIES, INC. MAKES NO ENDORSEMENT OF THIS OR ANY SYSTEM NOR WARRANTS ITS PERFORMANCE. This is not the only trading system that Striker executes for its clients. Potential traders should carefully investigate, evaluate and compare trading systems before investing capital. Some or all trading systems may involve an inappropriate level of risk for potential traders. It is the nature of commodity trading that where there is the opportunity for profit, there is also the risk of loss. In opening an account through Striker, Customer acknowledges and agrees that he/she will rely solely upon the information that Striker provides to you. Thus, all prior third-party materials provided are superseded by the information and disclosures provided by Striker.

Important Information About this Trading System Analysis

Statistics, tables, charts and other information on trading system monthly performance are based on actual trading unless otherwise specified. Actual dollar and percentage gains/losses experienced by investors would depend on many factors not accounted for in these statistics, including, but not limited to, starting account balances, market behavior, developer fees, incidence of split fills and other variations in order execution, and the duration and extent of individual investor participation in the specified system. While the information and statistics given are believed to be complete and accurate we cannot guarantee their completeness or accuracy as they results are key punched and subject to human error. Performance information is not the performance of a single account, but a compilation of several accounts over time, and is based on the physical trading ticket. THIS INFORMATION IS PROVIDED FOR EDUCATIONAL/ INFORMATIONAL PURPOSES ONLY AND USED BY CURRENT CLIENTS TO AUDIT THEIR STATEMENTS TO STRIKER SITE. These results are not indicative of, and have no bearing on, any individual results that may be attained by the trading system in the future.

This trading system, like any other, may involve an inappropriate level of risk for prospective investors. THE RISK OF LOSS IN TRADING COMMODITY FUTURES AND OPTIONS CAN BE SUBSTANTIAL AND MAY NOT BE SUITABLE FOR ALL INVESTORS. Prior to purchasing or leasing a trading system from this or any other system vendor or investing in a trading system with a registered commodity trading representative, investors need to carefully consider whether such trading is suitable for them in light of their own specific financial condition. In some cases, futures accounts are subject to substantial charges for commission, management, incentive or advisory fees. It may be necessary for accounts subject to these charges to make substantial trading profits to avoid depletion or exhaustion of their assets. In addition, one should carefully study the accompanying prospectus, account forms, disclosure documents and/or risk disclosure statements required by the CFTC or NFA, which are provided directly by the system vendor and/or CTA's.

The information contained in this report is provided with the objective of "standardizing" trading systems measurements, and it is intended for educational /informational purposes only. All information is offered with the understanding that an investor considering purchasing or leasing a system must carry out his/her own research and due diligence in deciding whether to purchase or lease any trading system noted within or without this report. This report does not constitute a solicitation to purchase or invest in any trading system which may be mentioned herein. STRIKER SECURITIES, INC. MAKES NO ENDORSEMENT OF THIS OR ANY OTHER TRADING SYSTEM NOR WARRANTS ITS PERFORMANCE. THIS IS NOT A SOLICITATION TO PURCHASE OR SUBSCRIBE TO ANY TRADING SYSTEM.

Copyright © 1997-2018 Striker Securities, Inc. All rights reserved.

Disclaimer The risk of trading can be substantial and each investor and/or trader must consider whether this is a suitable investment. Past performance, whether actual or indicated by simulated historical tests of strategies, is not necessarily indicative of future results. Striker is a member of the National Futures Association ("NFA"), the Managed Funds Association ("MFA"), and the National Introducing Broker Association ("NIBA"). Striker is registered with the Commodity Futures Trading Commission ("CFTC"), and was formerly registered with the Securities Exchange Commission ("SEC"). Additionally, Striker is a former member of the Financial Industry Regulatory Authority ("FINRA"), and the Securities Investor Protection Corporation ("SIPC"). FINRA is the largest non-governmental regulator for all securities business in the United States. Please read Striker Disclosure Statement for the additional disclosure.

Futures Trading Disclaimer:

Transactions in securities futures, commodity and index futures and options on futures carry a high degree of risk. The amount of initial margin is small relative to the value of the futures contract, meaning that transactions are heavily "leveraged". A relatively small market movement will have a proportionately larger impact on the funds you have deposited or will have to deposit: this may work against you as well as for you. You may sustain a total loss of initial margin funds and any additional funds deposited with the clearing firm to maintain your position. If the market moves against your position or margin levels are increased, you may be called upon to pay substantial additional funds on short notice to maintain your position. If you fail to comply with a request for additional funds within the time prescribed, your position may be liquidated at a loss and you will be liable for any resulting deficit. For accounts that are deemed abandoned or inactive, Striker may charge up to a \$35.00 monthly inactivity fee, depending on the clearing firm where the account is held. If the Net Liquidity of an account reaches a Daily Loss Limit of 80%, open positions will attempt to be liquidated. Clients are responsible for monitoring their positions and are financially responsible for any losses generated by open positions in the account. Striker retains its right to liquidate positions in any account, at its sole discretion, with no forewarning.

Forex Trading Disclosure:

Trading cash Foreign Exchange ("FX") contracts carries the same high level of risk as futures trading (Futures Trading Disclaimer). However cash FX, unlike futures FX contracts that are regulated by the Commodity Trading Futures Commission, are not regulated by any governmental agency. In addition, because there is not a central clearing house for cash FX transactions, there is also a counterparty risk for each contract. For additional information please read the National Futures Association ("NFA") August 2003 "Investor Alert" found on the Striker Disclaimer Page.

Definitions:

Maximum Draw Down The biggest decline of equity over a specific period of time. Peak to valley is the difference between a high point of equity and the next lowest point of equity over a number of trades on the monthly basis.

Purpose: This indicator is used to help analyze the risk of an account.

How to use: The Maximum Draw Down is a tool for the portfolio selection process. It is used as a risk measure and allows individuals to get an indication about how an account might react to a trend of falling prices.

Sharpe Ratio Measures the return earned in excess of the risk-free rate on a portfolio to the portfolio's total risk. The prior month's 90 Day T-Bill Rate is used as risk-free rate.

Purpose: Like other risk-adjusted ratios, the Sharpe Ratio compares the returns to a specific measure of risk. Here, the standard deviation is used. The Sharpe Ratio helps evaluate the potential returns in light of the underlying risk.

How to use: The Sharpe Ratio is used to evaluate the quality rather than the quantity of the returns of a security or a portfolio of securities. The higher the value of the indicator, the better the quality of the returns on a risk/reward basis.

Sterling Ratio A risk-adjusted ratio given by dividing the returns on a security by the Maximum Draw Down (the biggest consecutive loss) for the same period.

Purpose: Like other risk-adjusted ratios, the Sterling Ratio compares the returns to a specific measure of risk. Here, the Maximum Draw Down is used. The Sterling Ratio helps evaluate the potential returns on a security in light of the underlying risk.

How to use: The Sterling Ratio is used to evaluate the quality rather than the quantity of the returns on a security or a portfolio of securities. The higher the value of the indicator, the better the quality of the returns on a risk/reward basis.

System Trades Disclosure:

System Description

"System Description" is based upon information obtained from specific system marketing documents, system developers and/or system vendors themselves. While the information is believed to be reliable, we cannot guarantee its completeness or accuracy.

Actual Monthly Performance

The table and charts represent the monthly/quarterly/annual summation of actual trades based on system-specified contract(s) executed through Striker

Securities, Inc. using the referenced trading system or system vendor for the stated time period. Commissions and monthly vendor fees are deducted from the tabulation. Results are based on 1 contract. If a client trades 2 contracts his gain or loss is twice as displayed (and so on). This table is presented for information purposes only and is not a solicitation for the referenced system or vendor. The purpose of this information is for clients to compare their brokerage statements to what is displayed on Striker's site. Striker as a matter of policy has no ownership with the referenced system or vendor or any other trading system or vendor. Past trade history may not be indicative of future results. The results indicated here may or may not be typical of the performance of this system and, ALTHOUGH I WE BELIEVE THIS INFORMATION TO BE ACCURATE, STRIKER SECURITIES, INC. MAKES NO ENDORSEMENT OF THIS OR ANY SYSTEM NOR WARRANTS ITS PERFORMANCE. This is not the only trading system that Striker executes for its clients. Potential traders should carefully investigate, evaluate and compare trading systems before investing capital. Some or all trading systems may involve an inappropriate level of risk for potential traders. It is the nature of commodity trading that where there is the opportunity for profit, there is also the risk of loss. In opening an account through Striker, Customer acknowledges and agrees that he/she will rely solely upon the information that Striker provides to you. Thus, all prior third-party materials provided are superseded by the information and disclosures provided by Striker.

Important Information About this Trading System Analysis

Statistics, tables, charts and other information on trading system monthly performance are based on actual trading unless otherwise specified. Actual dollar and percentage gains/losses experienced by investors would depend on many factors not accounted for in these statistics, including, but not limited to, starting account balances, market behavior, developer fees, incidence of split fills and other variations in order execution, and the duration and extent of individual investor participation in the specified system. While the information and statistics given are believed to be complete and accurate we cannot guarantee their completeness or accuracy as they results are key punched and subject to human error. Performance information is not the performance of a single account, but a compilation of several accounts over time, and is based on the physical trading ticket. THIS INFORMATION IS PROVIDED FOR EDUCATIONAL/ INFORMATIONAL PURPOSES ONLY AND USED BY CURRENT CLIENTS TO AUDIT THEIR STATEMENTS TO STRIKER SITE. These results are not indicative of, and have no bearing on, any individual results that may be attained by the trading system in the future.

This trading system, like any other, may involve an inappropriate level of risk for prospective investors. THE RISK OF LOSS IN TRADING COMMODITY FUTURES AND OPTIONS CAN BE SUBSTANTIAL AND MAY NOT BE SUITABLE FOR ALL INVESTORS. Prior to purchasing or leasing a trading system from this or any other system vendor or investing in a trading system with a registered commodity trading representative, investors need to carefully consider whether such trading is suitable for them in light of their own specific financial condition. In some cases, futures accounts are subject to substantial charges for commission, management, incentive or advisory fees. It may be necessary for accounts subject to these charges to make substantial trading profits to avoid depletion or exhaustion of their assets. In addition, one should carefully study the accompanying prospectus, account forms, disclosure documents and/or risk disclosure statements required by the CFTC or NFA, which are provided directly by the system vendor and/or CTA's.

The information contained in this report is provided with the objective of "standardizing" trading systems measurements, and it is intended for educational /informational purposes only. All information is offered with the understanding that an investor considering purchasing or leasing a system must carry out his/her own research and due diligence in deciding whether to purchase or lease any trading system noted within or without this report. This report does not constitute a solicitation to purchase or invest in any trading system which may be mentioned herein. STRIKER SECURITIES, INC. MAKES NO ENDORSEMENT OF THIS OR ANY OTHER TRADING SYSTEM NOR WARRANTS ITS PERFORMANCE. THIS IS NOT A SOLICITATION TO PURCHASE OR SUBSCRIBE TO ANY TRADING SYSTEM.

Copyright © 1997-2018 Striker Securities, Inc. All rights reserved.

Disclaimer The risk of trading can be substantial and each investor and/or trader must consider whether this is a suitable investment. Past performance, whether actual or indicated by simulated historical tests of strategies, is not necessarily indicative of future results. Striker is a member of the National Futures Association ("NFA"), the Managed Funds Association ("MFA"), and the National Introducing Broker Association ("NIBA"). Striker is registered with the Commodity Futures Trading Commission ("CFTC"), and was formerly registered with the Securities Exchange Commission ("SEC"). Additionally, Striker is a former member of the Financial Industry Regulatory Authority ("FINRA"), and the Securities Investor Protection Corporation ("SIPC"). FINRA is the largest non-governmental regulator for all securities business in the United States. Please read Striker Disclosure Statement for the additional disclosure.

Futures Trading Disclaimer:

Transactions in securities futures, commodity and index futures and options on futures carry a high degree of risk. The amount of initial margin is small relative to the value of the futures contract, meaning that transactions are heavily "leveraged". A relatively small market movement will have a proportionately larger impact on the funds you have deposited or will have to deposit: this may work against you as well as for you. You may sustain a total loss of initial margin funds and any additional funds deposited with the clearing firm to maintain your position. If the market moves against your position or margin levels are increased, you may be called upon to pay substantial additional funds on short notice to maintain your position. If you fail to comply with a request for additional funds within the time prescribed, your position may be liquidated at a loss and you will be liable for any resulting deficit. For accounts that are deemed abandoned or inactive, Striker may charge up to a \$35.00 monthly inactivity fee, depending on the clearing firm where the account is held. If the Net Liquidity of an account reaches a Daily Loss Limit of 80%, open positions will attempt to be liquidated. Clients are responsible for monitoring their positions and are financially responsible for any losses generated by open positions in the account. Striker retains its right to liquidate positions in any account, at its sole discretion, with no forewarning.

Forex Trading Disclosure:

Trading cash Foreign Exchange ("FX") contracts carries the same high level of risk as futures trading (Futures Trading Disclaimer). However cash FX, unlike futures FX contracts that are regulated by the Commodity Trading Futures Commission, are not regulated by any governmental agency. In addition, because there is not a central clearing house for cash FX transactions, there is also a counterparty risk for each contract. For additional information please read the National Futures Association ("NFA") August 2003 "Investor Alert" found on the Striker Disclaimer Page.

System Description

Market Sector: Financials

Markets Traded: [FV](#)

System Type: Swing Trading

Risk per Trade: varies

Trading Rules: Not Disclosed

Suggested Capital: \$14,000

Developer Fee: \$29.00 per Month

System Description:

fractalgo SwingTrader (FV) and all other related fractalgo products are pattern recognition programs. The programs use math and physics to identify fractal patterns in the market, switching from long to short and back again when new patterns emerge. Market data, including price, volume, momentum (delta and delta of delta) and elapsed time (duration of a pattern) is absorbed from every tick for the entire history of a market. Fourier transforms are used to evenly slice that data until all segments match and wave and group velocity functions are used to project forward that pattern to determine the next trades. fractalgo SwingTrader (FV) is systematic, unemotional and completely uncorrelated to any other analysis technique.

Statistical Summary

fractalgo SwingTrader (FV)	Tracked Since: November 14, 2016
Profit/Loss Total:	(\$2,252.94)

Definitions:

Maximum Draw Down The biggest decline of equity over a specific period of time. Peak to valley is the difference between a high point of equity and the next lowest point of equity over a number of trades on the monthly basis.

Purpose: This indicator is used to help analyze the risk of an account.

How to use: The Maximum Draw Down is a tool for the portfolio selection process. It is used as a risk measure and allows individuals to get an indication about how an account might react to a trend of falling prices.

Sharpe Ratio Measures the return earned in excess of the risk-free rate on a portfolio to the portfolio's total risk. The prior month's 90 Day T-Bill Rate is used as risk-free rate.

Purpose: Like other risk-adjusted ratios, the Sharpe Ratio compares the returns to a specific measure of risk. Here, the standard deviation is used. The Sharpe Ratio helps evaluate the potential returns in light of the underlying risk.

How to use: The Sharpe Ratio is used to evaluate the quality rather than the quantity of the returns of a security or a portfolio of securities. The higher the value of the indicator, the better the quality of the returns on a risk/reward basis.

Sterling Ratio A risk-adjusted ratio given by dividing the returns on a security by the Maximum Draw Down (the biggest consecutive loss) for the same period.

Purpose: Like other risk-adjusted ratios, the Sterling Ratio compares the returns to a specific measure of risk. Here, the Maximum Draw Down is used. The Sterling Ratio helps evaluate the potential returns on a security in light of the underlying risk.

How to use: The Sterling Ratio is used to evaluate the quality rather than the quantity of the returns on a security or a portfolio of securities. The higher the value of the indicator, the better the quality of the returns on a risk/reward basis.

System Trades Disclosure:

System Description

"System Description" is based upon information obtained from specific system marketing documents, system developers and/or system vendors themselves. While the information is believed to be reliable, we cannot guarantee its completeness or accuracy.

Actual Monthly Performance

The table and charts represent the monthly/quarterly/annual summation of actual trades based on system-specified contract(s) executed through Striker

Securities, Inc. using the referenced trading system or system vendor for the stated time period. Commissions and monthly vendor fees are deducted from the tabulation. Results are based on 1 contract. If a client trades 2 contracts his gain or loss is twice as displayed (and so on). This table is presented for information purposes only and is not a solicitation for the referenced system or vendor. The purpose of this information is for clients to compare their brokerage statements to what is displayed on Striker's site. Striker as a matter of policy has no ownership with the referenced system or vendor or any other trading system or vendor. Past trade history may not be indicative of future results. The results indicated here may or may not be typical of the performance of this system and, ALTHOUGH I WE BELIEVE THIS INFORMATION TO BE ACCURATE, STRIKER SECURITIES, INC. MAKES NO ENDORSEMENT OF THIS OR ANY SYSTEM NOR WARRANTS ITS PERFORMANCE. This is not the only trading system that Striker executes for its clients. Potential traders should carefully investigate, evaluate and compare trading systems before investing capital. Some or all trading systems may involve an inappropriate level of risk for potential traders. It is the nature of commodity trading that where there is the opportunity for profit, there is also the risk of loss. In opening an account through Striker, Customer acknowledges and agrees that he/she will rely solely upon the information that Striker provides to you. Thus, all prior third-party materials provided are superseded by the information and disclosures provided by Striker.

Important Information About this Trading System Analysis

Statistics, tables, charts and other information on trading system monthly performance are based on actual trading unless otherwise specified. Actual dollar and percentage gains/losses experienced by investors would depend on many factors not accounted for in these statistics, including, but not limited to, starting account balances, market behavior, developer fees, incidence of split fills and other variations in order execution, and the duration and extent of individual investor participation in the specified system. While the information and statistics given are believed to be complete and accurate we cannot guarantee their completeness or accuracy as they results are key punched and subject to human error. Performance information is not the performance of a single account, but a compilation of several accounts over time, and is based on the physical trading ticket. THIS INFORMATION IS PROVIDED FOR EDUCATIONAL/ INFORMATIONAL PURPOSES ONLY AND USED BY CURRENT CLIENTS TO AUDIT THEIR STATEMENTS TO STRIKER SITE. These results are not indicative of, and have no bearing on, any individual results that may be attained by the trading system in the future.

This trading system, like any other, may involve an inappropriate level of risk for prospective investors. THE RISK OF LOSS IN TRADING COMMODITY FUTURES AND OPTIONS CAN BE SUBSTANTIAL AND MAY NOT BE SUITABLE FOR ALL INVESTORS. Prior to purchasing or leasing a trading system from this or any other system vendor or investing in a trading system with a registered commodity trading representative, investors need to carefully consider whether such trading is suitable for them in light of their own specific financial condition. In some cases, futures accounts are subject to substantial charges for commission, management, incentive or advisory fees. It may be necessary for accounts subject to these charges to make substantial trading profits to avoid depletion or exhaustion of their assets. In addition, one should carefully study the accompanying prospectus, account forms, disclosure documents and/or risk disclosure statements required by the CFTC or NFA, which are provided directly by the system vendor and/or CTA's.

The information contained in this report is provided with the objective of "standardizing" trading systems measurements, and it is intended for educational /informational purposes only. All information is offered with the understanding that an investor considering purchasing or leasing a system must carry out his/her own research and due diligence in deciding whether to purchase or lease any trading system noted within or without this report. This report does not constitute a solicitation to purchase or invest in any trading system which may be mentioned herein. STRIKER SECURITIES, INC. MAKES NO ENDORSEMENT OF THIS OR ANY OTHER TRADING SYSTEM NOR WARRANTS ITS PERFORMANCE. THIS IS NOT A SOLICITATION TO PURCHASE OR SUBSCRIBE TO ANY TRADING SYSTEM.

Copyright © 1997-2018 Striker Securities, Inc. All rights reserved.

Disclaimer The risk of trading can be substantial and each investor and/or trader must consider whether this is a suitable investment. Past performance, whether actual or indicated by simulated historical tests of strategies, is not necessarily indicative of future results. Striker is a member of the National Futures Association ("NFA"), the Managed Funds Association ("MFA"), and the National Introducing Broker Association ("NIBA"). Striker is registered with the Commodity Futures Trading Commission ("CFTC"), and was formerly registered with the Securities Exchange Commission ("SEC"). Additionally, Striker is a former member of the Financial Industry Regulatory Authority ("FINRA"), and the Securities Investor Protection Corporation ("SIPC"). FINRA is the largest non-governmental regulator for all securities business in the United States. Please read Striker Disclosure Statement for the additional disclosure.

Futures Trading Disclaimer:

Transactions in securities futures, commodity and index futures and options on futures carry a high degree of risk. The amount of initial margin is small relative to the value of the futures contract, meaning that transactions are heavily "leveraged". A relatively small market movement will have a proportionately larger impact on the funds you have deposited or will have to deposit: this may work against you as well as for you. You may sustain a total loss of initial margin funds and any additional funds deposited with the clearing firm to maintain your position. If the market moves against your position or margin levels are increased, you may be called upon to pay substantial additional funds on short notice to maintain your position. If you fail to comply with a request for additional funds within the time prescribed, your position may be liquidated at a loss and you will be liable for any resulting deficit. For accounts that are deemed abandoned or inactive, Striker may charge up to a \$35.00 monthly inactivity fee, depending on the clearing firm where the account is held. If the Net Liquidity of an account reaches a Daily Loss Limit of 80%, open positions will attempt to be liquidated. Clients are responsible for monitoring their positions and are financially responsible for any losses generated by open positions in the account. Striker retains its right to liquidate positions in any account, at its sole discretion, with no forewarning.

Forex Trading Disclosure:

Trading cash Foreign Exchange ("FX") contracts carries the same high level of risk as futures trading (Futures Trading Disclaimer). However cash FX, unlike futures FX contracts that are regulated by the Commodity Trading Futures Commission, are not regulated by any governmental agency. In addition, because there is not a central clearing house for cash FX transactions, there is also a counterparty risk for each contract. For additional information please read the National Futures Association ("NFA") August 2003 "Investor Alert" found on the Striker Disclaimer Page.

System Description

Market Sector: Softs

Markets Traded: KC

System Type: Swing Trading

Risk per Trade: varies

Trading Rules: Not Disclosed

Suggested Capital: \$75,000

Developer Fee: \$119.00 per Month

System Description:

fractalgo SwingTrader (KC) and all other related fractalgo products are pattern recognition programs. The programs use math and physics to identify fractal patterns in the market, switching from long to short and back again when new patterns emerge. Market data, including price, volume, momentum (delta and delta of delta) and elapsed time (duration of a pattern) is absorbed from every tick for the entire history of a market. Fourier transforms are used to evenly slice that data until all segments match and wave and group velocity functions are used to project forward that pattern to determine the next trades. fractalgo SwingTrader (KC) is systematic, unemotional and completely uncorrelated to any other analysis technique.

Statistical Summary

Definitions:

Maximum Draw Down The biggest decline of equity over a specific period of time. Peak to valley is the difference between a high point of equity and the next lowest point of equity over a number of trades on the monthly basis.

Purpose: This indicator is used to help analyze the risk of an account.

How to use: The Maximum Draw Down is a tool for the portfolio selection process. It is used as a risk measure and allows individuals to get an indication about how an account might react to a trend of falling prices.

Sharpe Ratio Measures the return earned in excess of the risk-free rate on a portfolio to the portfolio's total risk. The prior month's 90 Day T-Bill Rate is used as risk-free rate.

Purpose: Like other risk adjusted ratios, the Sharpe Ratio compares the returns to a specific measure of risk. Here, the standard deviation is used. The Sharpe Ratio helps evaluate the potential returns in light of the underlying risk.

How to use: The Sharpe Ratio is used to evaluate the quality rather than the quantity of the returns of a security or a portfolio of securities. The higher the value of the indicator, the better the quality of the returns on a risk/reward basis.

Sterling Ratio A risk-adjusted ratio given by dividing the returns on a security by the Maximum Draw Down (the biggest consecutive loss) for the same period.

Purpose: Like other risk adjusted ratios, the Sterling Ratio compares the returns to a specific measure of risk. Here, the Maximum Draw Down is used.

How to use: The Sterling Ratio helps evaluate the potential returns on a security in light of the underlying risk.

How to use: The Sterling Ratio is used to evaluate the quality rather than the quantity of the returns on a security or a portfolio of securities. The higher the value of the indicator, the better the quality of the returns on a risk/reward basis.

System Trades Disclosure:

System Description

"System Description" is based upon information obtained from specific system marketing documents, system developers and/or system vendors themselves. While the information is believed to be reliable, we cannot guarantee its completeness or accuracy.

Actual Monthly Performance

The table and charts represent the monthly/quarterly/annual summation of actual trades based on system-specified contract(s) executed through Striker Securities, Inc. using the referenced trading system or system vendor for the stated time period. Commissions and monthly vendor fees are deducted from the tabulation. Results are based on 1 contract. If a client trades 2 contracts his gain or loss is twice as displayed (and so on). This table is presented for information purposes only and is not a solicitation for the referenced system or vendor. The purpose of this information is for clients to compare their brokerage statements to what is displayed on Striker's site. Striker as a matter of policy has no ownership with the referenced system or vendor or any other trading system or vendor. Past trade history may not be indicative of future results. The results indicated here may or may not be typical of the performance of this system and, **ALTHOUGH WE BELIEVE THIS INFORMATION TO BE ACCURATE, STRIKER SECURITIES, INC. MAKES NO ENDORSEMENT OF THIS OR ANY SYSTEM NOR WARRANTS ITS PERFORMANCE.** This is not the only trading system that Striker executes for its clients. Potential traders should carefully investigate, evaluate and compare trading systems before investing capital. Some or all trading systems may involve an inacceptable level of risk for

potential traders. It is the nature of commodity trading that where there is the opportunity for profit, there is also the risk of loss. In opening an account through Striker, Customer acknowledges and agrees that he/she will rely solely upon the information that Striker provides to you. Thus, all prior third-party materials provided are superseded by the information and disclosures provided by Striker.

Important Information About this Trading System Analysis

Statistics, tables, charts and other information on trading system monthly performance are based on actual trading unless otherwise specified. Actual dollar and percentage gains/losses experienced by investors would depend on many factors not accounted for in these statistics, including, but not limited to, starting account balances, market behavior, developer fees, incidence of split fills and other variations in order execution, and the duration and extent of individual investor participation in the specified system. While the information and statistics given are believed to be complete and accurate we cannot guarantee their completeness or accuracy as they results are key punched and subject to human error. Performance information is not the performance of a single account, but a compilation of several accounts over time, and is based on the physical trading ticket. THIS INFORMATION IS PROVIDED FOR EDUCATIONAL/ INFORMATIONAL PURPOSES ONLY AND USED BY CURRENT CLIENTS TO AUDIT THEIR STATEMENTS TO STRIKER SITE. These results are not indicative of, and have no bearing on, any individual results that may be attained by the trading system in the future.

This trading system, like any other, may involve an inappropriate level of risk for prospective investors. THE RISK OF LOSS IN TRADING COMMODITY FUTURES AND OPTIONS CAN BE SUBSTANTIAL AND MAY NOT BE SUITABLE FOR ALL INVESTORS. Prior to purchasing or leasing a trading system from this or any other system vendor or investing in a trading system with a registered commodity trading representative, investors need to carefully consider whether such trading is suitable for them in light of their own specific financial condition. In some cases, futures accounts are subject to substantial charges for commission, management, incentive or advisory fees. It may be necessary for accounts subject to these charges to make substantial trading profits to avoid depletion or exhaustion of their assets. In addition, one should carefully study the accompanying prospectus, account forms, disclosure documents and/or risk disclosure statements required by the CFTC or NFA, which are provided directly by the system vendor and/or CTA's.

The information contained in this report is provided with the objective of "standardizing" trading systems measurements, and it is intended for educational /informational purposes only. All information is offered with the understanding that an investor considering purchasing or leasing a system must carry out his/her own research and due diligence in deciding whether to purchase or lease any trading system noted within or without this report. This report does not constitute a solicitation to purchase or invest in any trading system which may be mentioned herein. STRIKER SECURITIES, INC. MAKES NO ENDORSEMENT OF THIS OR ANY OTHER TRADING SYSTEM NOR WARRANTS ITS PERFORMANCE. THIS IS NOT A SOLICITATION TO PURCHASE OR SUBSCRIBE TO ANY TRADING SYSTEM.

Disclaimer The risk of trading can be substantial and each investor and/or trader must consider whether this is a suitable investment. Past performance, whether actual or indicated by simulated historical tests of strategies, is not necessarily indicative of future results. Striker is a member of the National Futures Association ("NFA"), the Managed Funds Association ("MFA"), and the National Introducing Broker Association ("NIBA"). Striker is registered with the Commodity Futures Trading Commission ("CFTC"), and was formerly registered with the Securities Exchange Commission ("SEC"). Additionally, Striker is a former member of the Financial Industry Regulatory Authority ("FINRA"), and the Securities Investor Protection Corporation ("SIPC"). FINRA is the largest non-governmental regulator for all securities business in the United States. Please read Striker Disclosure Statement for the additional disclosure.

Futures Trading Disclaimer:

Transactions in securities futures, commodity and index futures and options on futures carry a high degree of risk. The amount of initial margin is small relative to the value of the futures contract, meaning that transactions are heavily "leveraged". A relatively small market movement will have a proportionately larger impact on the funds you have deposited or will have to deposit: this may work against you as well as for you. You may sustain a total loss of initial margin funds and any additional funds deposited with the clearing firm to maintain your position. If the market moves against your position or margin levels are increased, you may be called upon to pay substantial additional funds on short notice to maintain your position. If you fail to comply with a request for additional funds within the time prescribed, your position may be liquidated at a loss and you will be liable for any resulting deficit. For accounts that are deemed abandoned or inactive, Striker may charge up to a \$35.00 monthly inactivity fee, depending on the clearing firm where the account is held. If the Net Liquidity of an account reaches a Daily Loss Limit of 80%, open positions will attempt to be liquidated. Clients are responsible for monitoring their positions and are financially responsible for any losses generated by open positions in the account. Striker retains its right to liquidate positions in any account, at its sole discretion, with no forewarning.

Forex Trading Disclosure:

Trading cash Foreign Exchange ("FX") contracts carries the same high level of risk as futures trading (Futures Trading Disclaimer). However cash FX, unlike futures FX contracts that are regulated by the Commodity Trading Futures Commission, are not regulated by any governmental agency. In addition, because there is not a central clearing house for cash FX transactions, there is also a counterparty risk for each contract. For additional information please read the National Futures Association ("NFA") August 2003 "Investor Alert" found on the Striker Disclaimer Page.

System Description

Market Sector: Softs

Markets Traded: SB

System Type: Swing Trading

Risk per Trade:

Trading Rules: Not Disclosed

Suggested Capital: \$22,000

Developer Fee: \$39.00 per Month

System Description:

fractalgo SwingTrader (SB) and all other related fractalgo products are pattern recognition programs. The programs use math and physics to identify fractal patterns in the market, switching from long to short and back again when new patterns emerge. Market data, including price, volume, momentum (delta and delta of delta) and elapsed time (duration of a pattern) is absorbed from every tick for the entire history of a market. Fourier transforms are used to evenly slice that data until all segments match and wave and group velocity functions are used to project forward that pattern to determine the next trades. fractalgo SwingTrader (SB) is systematic, unemotional and completely uncorrelated to any other analysis technique.

Statistical Summary

fractalgo SwingTrader (SB)	Tracked Since: November 10, 2016
Profit/Loss Total:	(\$2,349.84)
Avg Annual Profit/Loss:	N/A

Definitions:

Maximum Draw Down The biggest decline of equity over a specific period of time. Peak to valley is the difference between a high point of equity and the next lowest point of equity over a number of trades on the monthly basis.

Purpose: This indicator is used to help analyze the risk of an account.

How to use: The Maximum Draw Down is a tool for the portfolio selection process. It is used as a risk measure and allows individuals to get an indication about how an account might react to a trend of falling prices.

Sharpe Ratio Measures the return earned in excess of the risk-free rate on a portfolio to the portfolio's total risk. The prior month's 90 Day T-Bill Rate is used as risk-free rate.

Purpose: Like other risk-adjusted ratios, the Sharpe Ratio compares the returns to a specific measure of risk. Here, the standard deviation is used. The Sharpe Ratio helps evaluate the potential returns in light of the underlying risk.

How to use: The Sharpe Ratio is used to evaluate the quality rather than the quantity of the returns of a security or a portfolio of securities. The higher the value of the indicator, the better the quality of the returns on a risk/reward basis.

Sterling Ratio A risk-adjusted ratio given by dividing the returns on a security by the Maximum Draw Down (the biggest consecutive loss) for the same period.

Purpose: Like other risk-adjusted ratios, the Sterling Ratio compares the returns to a specific measure of risk. Here, the Maximum Draw Down is used. The Sterling Ratio helps evaluate the potential returns on a security in light of the underlying risk.

How to use: The Sterling Ratio is used to evaluate the quality rather than the quantity of the returns on a security or a portfolio of securities. The higher the value of the indicator, the better the quality of the returns on a risk/reward basis.

System Trades Disclosure:

System Description

"System Description" is based upon information obtained from specific system marketing documents, system developers and/or system vendors themselves. While the information is believed to be reliable, we cannot guarantee its completeness or accuracy.

Actual Monthly Performance

The table and charts represent the monthly/quarterly/annual summation of actual trades based on system-specified contract(s) executed through Striker

Securities, Inc. using the referenced trading system or system vendor for the stated time period. Commissions and monthly vendor fees are deducted from the tabulation. Results are based on 1 contract. If a client trades 2 contracts his gain or loss is twice as displayed (and so on). This table is presented for information purposes only and is not a solicitation for the referenced system or vendor. The purpose of this information is for clients to compare their brokerage statements to what is displayed on Striker's site. Striker as a matter of policy has no ownership with the referenced system or vendor or any other trading system or vendor. Past trade history may not be indicative of future results. The results indicated here may or may not be typical of the performance of this system and, ALTHOUGH I WE BELIEVE THIS INFORMATION TO BE ACCURATE, STRIKER SECURITIES, INC. MAKES NO ENDORSEMENT OF THIS OR ANY SYSTEM NOR WARRANTS ITS PERFORMANCE. This is not the only trading system that Striker executes for its clients. Potential traders should carefully investigate, evaluate and compare trading systems before investing capital. Some or all trading systems may involve an inappropriate level of risk for potential traders. It is the nature of commodity trading that where there is the opportunity for profit, there is also the risk of loss. In opening an account through Striker, Customer acknowledges and agrees that he/she will rely solely upon the information that Striker provides to you. Thus, all prior third-party materials provided are superseded by the information and disclosures provided by Striker.
